

2021 REPI CHALLENGE Pre-Proposal Form

**Note: Text length is limited to box size.*

Project Name

Partner submitting proposal and point of contact information

Please list any other participating organizations.

Installation

Total Acreage of Project	<input type="checkbox"/> Fee Title	Total Acquisition Cost	Total Natural Resource Management Cost
<input type="text"/>	<input type="checkbox"/> Easement	<input type="text"/>	<input type="text"/>

A. Encroachment Threat

Please contact the appropriate military Service representative (see the RFP) for information on the next two questions.

1. Strategic Military Benefit and Summary of 2021 Challenge Focus Areas

Briefly describe how the project fits into a coordinated and comprehensive approach to preventing or managing encroachment; and how the project promotes land conservation or management activities that limit incompatible development in the vicinity of DoD installations and ranges, or that relieves current or anticipated environmental restrictions in support of the key capabilities identified in the National Defense Strategy. Specifically reference those key capabilities on page 3 of the RFP that this project aims to protect.

2. Encroachment Threat

Briefly describe the encroachment threat to the military mission that this project addresses. Include specifics regarding restrictions on military activities that this project will help to prevent, reduce or mitigate.

B. Justification under the 10 U.S.C. 2684a Statute

Consideration will be given to projects that maintain or improve installation resilience as well as layering multiple authorities (e.g., Sikes Act, Intergovernmental Support Agreements).

(choose 3-a, 3-b, or 3-c)

- 3-a: Briefly describe the current status/use of project land, and the likelihood that the project land will be incompatibly developed.
- 3-b: Briefly describe the threatened and endangered species and/or species at risk, and their habitats, within the project land or that affect the military mission as well as the status of USFWS coordination efforts, if applicable.
- 3-c: Briefly describe how protection of the project land maintains or improves installation resilience (e.g., water supply, extreme weather events, coastal resilience, wildfire management). Scientific evidence of resilience benefits needs to be provided to claim this criteria.

C. Project Finances

Please provide an overview of the proposed financing for the project, including cash funding sources, bargain sale opportunities, below fair market value sale opportunities, land exchanges, in-kind contributions, etc.

Estimated Project Financial Summary

Partner Contributions	Service Funding (If appropriate)	REPI Funding Request	Other (Explain)	Total Anticipated Project Costs

D. Maps

Please provide a pdf map and shape files of the parcel(s) of land in your project in a compressed folder.

Please submit by 8 p.m. Eastern on Monday, November 23, 2020
